EXPERIENCE

Productive Edge, Chicago Illinois (Remote) — *Front-End Web Developer III*

April 2022 - February 2024

Planned the front-end architecture for the development of websites and web applications for clients.

Coordinated with back-end developers, project managers, and clients to develop solutions and maintain transparency in project progress.

Developed websites and web applications based on project needs.

Answered questions from junior developers and collaborated on solutions. Reviewed, tested, and debugged code from other developers.

Red Banner Media, LLC, Oneonta, NY — *Full Stack Web Developer, CEO*

April 2020 - April-2022

I collaborated with other teams of developers to create a full roadmap for development.

Acted as a Scrum master for WriterBoards. Coordinating between a small team to maintain a large catalog of features and bugs presented by users.

Reviewed, tested, and debugged code from other developers. Co-designed API backend made with PHP and MySQL.

Removed superfluous aspects of the Front-End codebase to match the needs of the project and Vue best practices.

Eagle Productivity Solutions, Rochester, NY — *Full Stack Web Developer*

August 2018 - January 2020

Develop websites and web/mobile applications. Coordinate with a team of other developers and programmers, Project Managers, Graphic Designers, and Production Staff.

Work with writers and instructional designers to understand content and offer design, layout, and user-interaction/functionality suggestions as needed.

Consult with the client and internal team on best use of client infrastructure. (Existing web servers, SharePoint, External platforms)
