EXPERIENCE

Productive Edge, Chicago Illinois (Remote) — *Front-End Web Developer III*

April 2022 - February 2024

- Developed full stack solution, where I used Laravel-mix to render Blade and Vue components for quick page renders. In addition, this sped up the site as there wasn't a need to wait on an API end-point before rendering. Styled with Tailwind each component followed a figma design.

- I created an MVP using Caspio as a backend API and vanilla HTML, CSS, and JavaScript. After reaching an MVP, I designed the architecture for the front end. Using Vue 3, SCSS, and Axios.js (for better API calls), we created a feature-rich front-end experience for their customers.

- On a tight deadline, we updated a health insurance company's website from an old HTML table structure to a modern mobile responsive website. I was also collaborating with a mobile developer to use the website as the front end for the mobile app. We were able to iterate quickly using HTML, CSS, and Alpine.js.

- Collaborating with a team of developers, I created the structure for the front-end using Vue, Vuetify, Vuelidate, and Axios.js, Using Vuetify and Vuelidate to speed up validation and the UI development we were quickly able to create the website.

Red Banner Media, LLC, Oneonta, NY — *Full Stack Web Developer, CEO*

April 2020 - April-2022

- A delivery driving company needed a dashboard that was easy to handle and mobile responsive. Having been the architect for the front end, I leveraged knowledge of Vue 3 and Tailwind CSS.

- I was originally hired as a freelancer and then brought on full-time to Productive Edge. I leveraged my skills as a full-stack developer working on a Laravel, Vue, and Tailwind project.

Eagle Productivity Solutions, Rochester, NY — *Full Stack Web Developer*

August 2018 - January 2020

- In collaboration with copywriters and product managers, I created widgets for Inkling LMS ranging from word matches to drag-and-drop cards.
- Developed internal websites using SharePoint as the server for several clients. Using Angular.js, Vue, Bootstrap, and vanilla JavaScript.
- Automated updating of text, links, and images for Inkling books, using a mixture of PHP, Bash, and SVN.
- Created several pages and widgets for an October CMS site. Utilizing HTML, CSS, Twig, JavaScript, and PHP.

SKILLS

MVC Design Patterns, Mobile responsiveness, Scrum, Time Management, Troubleshooting & Debugging, Test Driven Development, Object-Oriented Programming

Technology

Coding Languages- HTML5, CSS3, JavaScript, Typescript, PHP, MySQL, Bash

Libraries & Frameworks- Laravel, Livewire, Next.js, React, Vue, Alpine, Tailwind, SASS, SCSS, Svelte, Sveltekit, Bootstrap, October CMS, Twig

Software & Tools- Git, GitHub, Apache2, Docker, Storybook, Figma, Linux, SSH

EDUCATION

Art Institute of Pittsburgh, Pittsburgh, PA — *BS in Game Art And Design*

2007 - 2012

Orange County Community College, Middletown, NY — *AA in Liberal Arts*

2004 - 2007
